PROJECTS

Rule_Zero (React, Next.js, Prisma, PostgreSQL, Firebase, GROQ API)

GitHub : https://github.com/WolverineAryan/Rule_Zero, **Live :** <https://rule-zero.vercel.app/>

- Built a full-stack platform that structures Indian laws and regulations into a searchable library, using AI to simplify legal language for citizens and startups.

Solar Flare Early Warning System (Aditya-L1) (Next.js, Tensorflow, Websockets, Fast API, Tailwind)

GitHub : https://github.com/WolverineAryan/Solar_Flare_Detection_System, **Live :** <https://solarflaredetectionsystem.shreyashelar.tech/>

- An ML-powered Ground Segment processor and real-time visualization dashboard designed to ingest, clean, and analyze solar X-ray telemetry from the SoLEXS and HEL1OS instruments onboard ISRO's Aditya-L1 observatory using custom deep learning models (Autoencoders, CNNs, BiLSTMs) for forecasting.

Levgress (React, Vite, Node.js, Express, MongoDB, Socket.io, Firebase Auth, GROQ API)

GitHub : <https://github.com/WolverineAryan/Levgress>, **Live :** <https://levgress.vercel.app>

- Built a gamified student progress-tracking platform with live 10+ users where students submit project milestones to earn XP and badges, and instructors review submissions with real-time feedback via Socket.io and AI-assisted grading through the Groq API.
